December 19, 2016

Dear recruiting team,

I read your job opening for the post of a Systems Engineer on an online portal. As a talented Computer Science Engineer, with qualifications as per your requirements at Infosys I am certain that I would make a vulnerable addition to your company. I am excited to work with Indias most admired company that is well known for its values and ethics, where I can enhance my knowledge and show the best out of me. I am sure that being part of a faster growing company like Infosys is going to help me enhance my career.

I earned my Bachelor's degree in Computer Science and Engineering from University of Calicut with distinction. In addition to my solid educational foundation, I have gained practical knowledge from workshops and trainings outside campus and have a passion towards programming. I have my hands-on experience in java as part of developing a software that helped to reach information to many students and other people. I have also developed an automation system for houses to save energy working on its hardware section.

I truly believe in continued education and research, and continue to seek new software and methods to assist with product development. I hope to bring my knowledge, and future knowledge, to your organization.

Kindly review my attached my resume for additional details regarding me. As a fresher I believe I can learn a lot by working with experts like you. I look forward to the opportunity to contribute to your ongoing success.

Thank you for your time and consideration.

Sincerely,

Athira Unni
